SUMMARY

Software Engineer I with robust internship experience building scalable, secure, and fault-tolerant services. Developed AI pipelines and web applications, enhancing system test coverage and production reliability. Proficient in Java, Python, and AWS infrastructure, with a keen ability to debug and optimize service performance.

EDUCATION

UNIVERSITY OF ST. THOMAS

B.Sc., Computer Science

Jun 2026

EXPERIENCE

CUSTOM AI STUDIO

Dec 2024 - Feb 2025

SOFTWARE ENGINEERING INTERN

Remote

- Engineered a Python RAG pipeline using Pinecone vector databases and OpenAI embeddings, improving retrieval accuracy by 20% and enabling LLM-powered assistants.
- Developed a robust macOS application in Flutter interfacing with AI agents via RESTful N8N webhooks; increased system test coverage to 85% using PyTest and Flutter test to ensure resilient service performance.
- Coordinated a team of four interns through Agile sprints by managing daily stand-ups and delivering a functional MVP within one month while contributing to architectural decisions.

UNIVERSITY OF ST. THOMAS

Oct 2024 - Present

WEB DEVELOPMENT INTERN

Saint Paul, MN

- Constructed reusable React components and internal APIs for a campus intranet serving 5,000+ users, focusing on scalable and secure access.
- Established CI/CD pipelines with GitHub Actions and enforced comprehensive unit and integration tests to contribute to fault-tolerant deployments.
- Collaborated with accessibility specialists to achieve full WCAG 2.1 AA compliance, ensuring a high-quality user experience.

UNIVERSITY OF ST. THOMAS

Mar 2023 - Present

SALESFORCE ADMIN INTERN

Saint Paul, MN

- Facilitated effective communication between technical teams and administration to add over 100 features, contributing to the award-winning 2024 Most Valuable Team performance.
- Automated data validation and reconciliation workflows in Apex, reducing report discrepancies by 30% and reinforcing dependable operations.
- Developed more than 50 custom Permission Sets and implemented Robot Framework tests, automating over 50% of front-end testing to enhance system reliability.

PROJECTS

EUREKA - CAMPUS BUDDY

- Created a campus social platform that matches students for study groups and events, now with 30+ active users.
- Implemented push notifications and real time messaging, increasing daily active engagement by 40%.

CLASSFINDER AI

- Orchestrated MajorAgent and ClassAgent to deliver AI assisted degree and course planning with live seat counts.
- Reduced query latency by 45% through RL based tool selection and vectorized shared memory.

KNOX CRM

- Built a CRM for a window cleaning business, automating job scheduling, geo tracking, and billing.
- Deployed TypeScript Cloud Functions that send reminder SMS and update lead statuses, cutting no shows by 30%.

SKILLS

- Languages:** Python, Java, JavaScript/TypeScript, C, HTML/CSS
- Specialized Skills:** PyTorch, OpenCV, Scikit Learn, OpenAI API, Pinecone, Building custom MCP servers, Event Driven Architecture, Microservices, Degree
- Frameworks & Libraries:** Flask, FastAPI, React, Flutter, Spring
- Data & Cloud:** AWS (Lambda, S3), AWS Services, Firebase, Supabase, BigQuery, SQLite, MongoDB
- Tools & Practices:** Git, Linux, Docker, Jira, n8n, Sentry, GitHub Actions, Debugging In Production
